

WINTER TRITICALE Kasyno

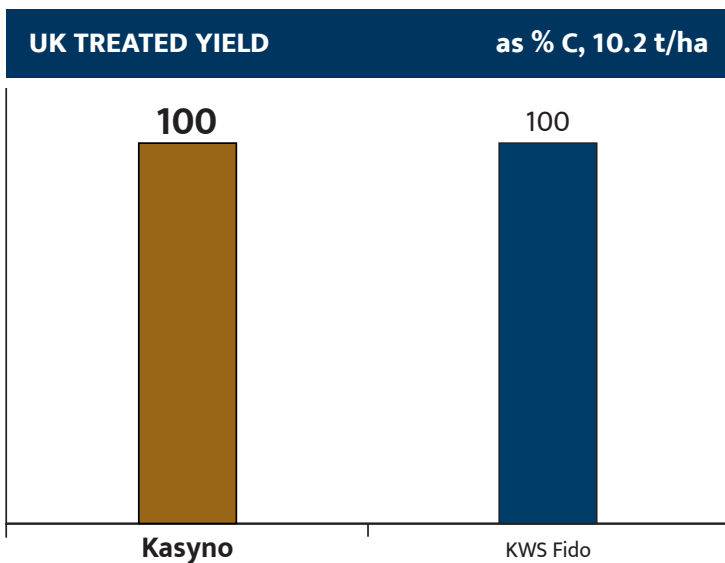

- Good yields
- Short, stiff straw
- Excellent yellow rust resistance

Kasyno is an established, consistent variety. It is short, stiff-strawed and attractive, finishing well in the field. Consistent yields and excellent standing power make Kasyno suitable for all soil types to maximise performance. Kasyno has excellent yellow rust resistance.

The performance of triticale in a second cereal situation has for many years been underestimated. Interest is now increasing on farm in this flexible, high yielding crop. Second cereal yields on farm can compare favourably with other crops, including wheat.

A principle market for triticale is for grain and for on farm feeding. There is an expanding market in anaerobic digestion, where triticale's low costs, ease of management and dry matter yields are attractive. Senova's leading varieties are proving popular for AD plants.

Triticale is also well suited for bioethanol production, with its inherently high fermentable carbohydrates and soluble proteins. In addition, triticale is very productive in NVZs and under lower input systems.

GRAIN QUALITY

Specific weight (kg/hl)	71.6
Protein content %	10.4

AGRONOMICS

Lodging %	[2]
Straw length (cm)	105
Ripening (days ± KWS Fido)	+1

DISEASE RESISTANCE

Yellow rust	8
