KWS DAWSUM

Group 4 Winter Wheat
KWS Kerrin x Costello

- Exceptional specific weight (79.9 kg/hl)
- Very high yield potential across all regions of the UK
- Super flexible on-farm with a wide sowing window

Awesome Dawsum - the excellent barn-filling choice with outstanding grain quality including one of the highest specific weights on the market today.

KWS Dawsum is a hard Group 4 wheat that offers growers the ultimate flexibility on-farm, delivering fantastic yields right across the rotation if you are drilling early (105%), mainstream (103%) or late sown slots (103%).

Combine these benefits with the excellent disease package, the variety delivers an untreated yield (89%) and includes 6.3 for *Septoria* and 9 for yellow rust.

Add in the exceptionally marketable grain and you have a truly D-awsome variety that will earn itself a place on every farm this season!

Late	103

Disease resistance and agronomy of KWS DAWSUM

KWS DAWSUM end markets

A classic hard Group 4 barn filler, KWS Dawsum meets and exceeds the intake requirements of the animal feed sector. In addition, thanks to its outstanding specific weight, KWS Dawsum may also find favour in the flour milling industry; always check with your local home.

In seasons when specific weights come under pressure and the risk for claims is high, the added security of choosing KWS Dawsum with its exceptional specific weight will deliver peace of mind at harvest.

KWS DAWSUM - Sowing for Peak Performance

80% of your crop’s potential is locked in by the seed you buy and sow. While you can finetune this with the correct nitrogen levels, using fungicides wisely to protect it from disease and paying attention to basic management principles, many attributes of your crop can’t be changed. Therefore, it pays for you and your agronomist to make proactive choices before ordering a variety.

To get peak performance from KWS Dawsum we recommend drilling in the following time window:

At KWS, we believe to get the best performance on your farm it is critical that when you choose your variety, you are using a wealth of data to tailor your choice for both your farm and individual field situation.
