

SY CANYON

High yield performance combined with exceptional grain quality

SY Canyon	
UK Yield	106
East	105
West	106
North	106
2022	107
2023	106
2024	105
Light soils	106
Heavy soils	101
Untreated Yield	91
Mildew (1-9)	7
Brown Rust (1-9)	6
Rhynchosporium (1-9)	7
Net Blotch (1-9)	5
Specific weight (kg/hl)	71.1
Resistance to lodging with PGR (1-9)	6
Ripening (days +/- KWS Orwell)	-1

AHDB Recommended List 2025/26

What can hybrid vigour do for you?

Yield

High & stable yield across soil types, regions & seasons

Excellent agronomics

Outstanding disease resistance, high specific weight & early to mature

Grass weedsuppression

Scientifically proven to be the best at suppressing black grass, ryegrass & brome

Heterosis underground

Enhanced nitrogen use efficiency & superior rooting – powered by hybrid vigour

Flexibility

Harvest as grain for feed or whole-crop for biogas production

Next generation traits

Barley Yellow Dwarf Virus resistance
+ Wheat Dwarf Virus tolerance

“

“**SY CANYON** brings high specific weight and combines it with high yield and strong disease resistance. This variety offers growers confidence, flexibility, and high performance across the board.”

”

Ben Urquhart
Hybrid Barley Technical Manager

SY CANYON at a glance

- Exceptional grain quality
- Strong on light land
- Good all round disease profile
- Performs well in all regions, particularly the west
